PROFILE

I'm a passionate software developer who delved into programming at 14, sparked by a curiosity about how software powers games. Since then, my enthusiasm has only grown. Starting my career in 2017 as a UI/UX designer, I gained insights into development workflows. I'm a continuous learner, exploring web development, Android, Python, and more.

My passion has been steadily expanding, and I am intrinsically motivated to consistently enhance my skills. I am capable of working independently on projects and collaborating effectively in teams.

WORK EXPERIENCE

Freelance Android Developer   2018-2023

- Jun 2023, "Goers – Activity Info & Tickets" - As a freelance Android developer, my responsibilities include Updating ticket booking views and workflows by implementing the Retrofit API.
- Jun 2023, "Ticket Scanner by Goers" - Activity updates to scan tickets based on ongoing events.
- Feb 2023, "ENEOS Mobile" - Updated new UI activities and added new features to the app.
- Okt 2022, "Auto360" - Updated new UI activities and added marketplace features to the app.
- Feb 2022, "MEDICINE APPS: Smart Pharmacy!" - Added new UI and quiz features to the app.
- Freelance experience with a total of 120+ apps, including 100+ personal projects on the Play Store, 10+ for exclusive company collaborations, and 8+ for relevant ventures.

Freelance Web Developer   2018-2023

- Aug 2023, "www.txtanalyst.com" - Building a website (CodeIgniter + Djanggo) for the purpose of researching word meanings: Visual Data and Article Conclusions.
- 2018, "wwwmataharijaya.co.id" - served as front-end building a new UI for the website.
- Engaged in 8 dynamic website projects, including 4 complete website projects, contributing to 3 back-end developments, and 1 front-end project.

UI UX   2017-2018

- In 2017, I served as a UI/UX designer at PT. Pandawa Nusantara.
- Designed the UI/UX for a POS application catering to culinary orders.
- Developed the UI/UX for an "ANTAM" gold information and ordering application.
- Crafted the UI/UX for a government administration website.
- Engineered the front-end for the corporate website "www.pandawa-nusantara.com," enhancing its visual appeal and user experience.
